

# Different Types of Electrical Conduit

**Rigid Metal Conduit (RMC)**

Typically used outdoors

**Intermediate Metal Conduit (IMC)**

Used in new outdoor construction projects

**Electrical Metallic Tubing (EMT)**

Used for exposed indoor wiring

**Electrical Non-Metallic Tubing (ENT)**

Typically used inside walls

**Flexible Metal Conduit (FMC)**

Used in dry indoor locations

**Liquid-Tight Flexible Metal Conduit (LFMC)**

Typically used with outdoor equipment

**Rigid Polyvinyl Chloride (Rigid PVC)**

Used in corrosive environments
